

Key Commitments

Licence number: CR000114

Service name	Source FM
Licence area	Falmouth and Penryn (as shown in the licensed coverage area map)
Frequency	96.1 MHz

Description of character of service

Source FM offers a voice and a forum to the people who live, study and work in Falmouth and Penryn, particularly those members of the community who have fewer opportunities to have their interests represented and their opinions heard.

The service broadcasts:

- Music. The main types of music broadcast over the course of each week are: mainstream and melodic music from the 1940s to the present day (during daytime) and more specialist genres outside of daytime.
- Speech. The main types of speech output broadcast over the course of each week are: news, interviews, discussions and features.
- The service provides original output¹ for a minimum of 10 hours per day.
- The service provides locally-produced output² for a minimum of 13 hours per day.

The studio is located within the licensed coverage area.

The service provides a range of community benefits (social gain objectives mandated by statute) for the target community, both on-air and off-air, and in doing so, achieves the following objectives:

- the facilitation of discussion and the expression of opinion,
- the provision (whether by means of programmes included in the service or otherwise) of education or training to individuals not employed by the person providing the service, and
- the better understanding of the particular community and the strengthening of links within it.

Members of the target community contribute to the operation and management of the service.

The service has mechanisms in place to ensure it is accountable to its target community.

[February 2009. Revised August 2013, September 2016]

¹ Original output is output that is first produced for and transmitted by the service, and excludes output that was transmitted elsewhere before. Original output can be live or voice-tracked. Repeat broadcasts of original output do not count towards the minimum requirement.

² Locally-produced output is any output made and broadcast from within the service's licensed coverage area. It may include all types of local production.
