

Digital Television Transmitters: pre-switchover network

This leaflet provides details of the Digital Terrestrial Television (DTT) transmitters which have not yet switched over to fully-digital operation (the 'low power' DTT network). Detailed information on post-switchover transmitter characteristics is available on the Ofcom website at www.ofcom.org.uk. Transmitters are grouped according to the ITV1 region that they broadcast, which will determine each transmitter's place in the digital switchover sequence. Details of the programme services carried in each multiplex are available on the Digital Television Group's website, www.dtg.org.uk/retailer. While this information is believed to be correct at the time of preparation, changes to the DTT network will occur, particularly as more transmitters switch to digital. For the latest information, please see the Ofcom website, www.ofcom.org.uk, or Digital UK's website, www.digitaluk.co.uk.
